average daily arrivals 13
% of Runway 04 arrivals 21%
daily range 0 - 65
days with no arrivals 54%
days with <10 arrivals 65%

The radar tracks shown are based on a four-day sample from the 2015 summer period. The tracks are colour-coded according to the height above mean sea level (amsl). Statistics on the numbers of operations relate to fixed-wing aircraft movements for the average 24-hour day calculated over the 92-day summer period from 16 June to 15 September 2015. The figures have been rounded to the nearest whole number.
