Highways England advise they will be carrying out essential maintenance work on the M1 between junction 23 and junction 23a, on both the northbound and southbound carriageways.

During the scheme the following works will be undertaken:

- Patching repairs to both carriageways
- Reinstatement of road markings and traffic loops
- Removal and replacement of the waterproofing layer of the West Meadow Viaduct.

Work is due to commence on 23 September 2019 and is scheduled for completion by the end of October 2019.

Only one carriageway at a time will be closed:

- **Northbound carriageway closure** from Monday 23 Sept until Thursday 3rd October (excluding Friday 27th Sept), between 21.00 and 05.00
- **Southbound carriageway closure** from Friday 4th October until 17th October (excluding Sunday night shifts of 6th and 13th October), between 22.00 and 06.00

Please note, all planned roadworks may be subject to change due to weather conditions or unforeseen circumstances and as such some Sunday shift working may be required.

Both carriageways will be open as usual outside of working hours on weekdays.

During weekend working, a single ‘daytime’ lane closure will remain in place for safety reasons.

A fully signed diversion route will be in place during the carriageway closures (see page 2 of this Information Notice).

Highways England politely ask all heavy good traffic to follow the M1 diversion route to help minimise the overnight disturbance experienced by communities in the surrounding area.
